

A new era is starting for Safe, Secure and Resilient Smart Cities and Territories. SecurIT is launching the first Open Call

And there it comes [SecurIT](#): New industrial value chain for Safe, Secure and Resilient Cities and Territories is an EU-funded project aiming to create a new global competitive security industry (product & service) by supporting a better integration of innovative security systems.

SecurIT's ambitious goal is to address multiple key gaps by supporting the development and the integration of innovative security solutions.

In a new global competitive industrial & service value chain SecurIT shall identify future security solutions needs and use cases related to specific test beds by selecting and supporting **up to 21 new project solutions** that will develop new and innovative prototypes. We are looking for **consortia composed of at least 2 SMEs**, Member State of the European Union or Associated countries of H2020, where at least one of the SME should be a technology/IT solution provider.

SecurIT aims to focus on increasing the security of current applications, services and infrastructures by integrating state-of-the-art security solutions or processes, supporting the creation of lead markets & market incentives in Europe.

Following an end-user driven approach, SecurIT will be facing three different challenges:

#Domain 1 **Sensitive infrastructure protection**: The security of sensitive sites is a major concern, confirmed by recent events, in a context of social unrest, terrorist threats and even a pandemic

#Domain 2 **Disaster Resilience**: Need of instruments for better prevention and preparedness, technologies for first and second responders and where relevant for citizens, and overall societal resilience.

#Domain 3 **Public spaces protection-major events**: A more connected city, integrating Artificial Intelligence, Cloud Computing and Big Data, where the population takes on a more active role in serving the community.

Find out more about the application process, the requirements and the benefits you will get, visit the official Open Call page: <https://bit.ly/3ApQInW>

In order to gather more informations about the application process, the eligibility criteria and the selection process, we want to invite you to join our **First Webinar**

When? **8th of February 2022, at 12PM CET**

During our session with specialists, we will go through some relevant information providing

- A complete overview of the project
- A detailed explanation of the selection process
- Q&A time with our specialists

If selected, you will receive

A **fixed lump sum of:**

- **Up to €74.000 per project** (with a maximum up to €60.000 per SME under Prototyping Instrument, including Jury Day mini-grant),
- **Up to €88.000 per project** (with a maximum up to €60.000 per SME under Demonstration Instrument, including Jury Day mini-grant).

Also, during the Webinar we will allow up to 10 participants to give 3 minutes pitch of their project idea in order to find a partner.

If you would like to pitch, please send us your 1-slide ppt in advance, before 7 February, 12:00 CET at info.securit@fundingbox.com
